

“We are a leading Microsoft partner\* and are a Global business with many offices across the UK. Our ambition is to be the best supplier of business solutions based on Microsoft technology. Solutions that let us sustainably improve our customers’ processes and results. We use Microsoft’s Azure cloud platform, Dynamics 365 and our unique, industry-specific solutions to develop the best strategy for your digital transformation and journey to the cloud.

I am the Managed Services Director and in January 2021 needed to find a recruitment partner who could help us resource skills we had not hired before. I spoke with Concept Resourcing about how they could help us and they understood what skills and type of people we needed to fulfil our clients’ service needs. We received a shortlist very quickly, and I am pleased to say we interviewed the majority of the candidates on this list. We hired two people; effortlessly and painlessly.

Following this initial positive experience, I have shared the details with a number of my colleagues across our software development, professional services and support divisions and Concept have had success in finding even more talent for our company.

With our ongoing investment from our PE partner, we are looking to scale and growth our business in the UK and aiming to grow with 30+ heads. We hope that Concept Resourcing can build on their initial success and be one of our partners of choice to identify and attract talent across technology, technology sales and procurement across the Microsoft ecosystem.”
